募集要項

COMPANY OVERVIEW

This company is the German subsidiary of the Japan-based world-wide Telecommunication company with offices in Düsseldorf, Frankfurt and Munich. Traditionally one of Japan's bestknown telecommunication companies, we are providing IT products and services, including hardware and network set-up. Since we cater to a wide range of clients, our everyday work is always new, efficient, and ambitious. While being part of a global corporation, this company is a straightforward working environment: open and in contact with the entire world, but small enough for all of us to support and look out for each other.

If this sounds appealing to you, then we are very much looking forward to welcoming you as our new

JOB RESPONSIBILITIES

As a core part of our Customer Projects and Support (CPS) Team in Düsseldorf you will ensure our customers receive exactly the service they need to meet their expectations. Your role therefore involves both technical expertise and people

skills. You will apply your considerable SE experience for building, maintaining, and revising servers and security applications and preparing hardware. Your people skills will enable your success in planning and launching projects, providing advice, and sometimes literally saving our customers' day with your efficient and on-the-mark troubleshooting. Moreover, you will support our sales team with your technical expertise, create effective documentation, and implement successful, up-to-date, and sustainable solutions.

Points of Attraction

- A direct employment contract with a competitive salary, clearly stated working times and compensation of overtime hours.
- Options for remote work and a centrally located, modern and comfortable office for office days.
- Fully funded local public transportation pass (Deutschland Ticket), capital-forming benefits and other little perks.
- 30 vacation days per year and additional half days off on Dec 24 and 31.
- A friendly, supportive, and international working environment with lots of opportunities for you to grow and realize your full potential.

JOB REQUIREMENTS

COMPETENCY ("Must") *Must meet all of the following requirements

With at least 5 years of experience as a Systems Engineer under your belt, you are an allrounder when it comes to server architectures (Cloud Virtualization Environment, Windows/Linux, VMware/Hyper-V/Xen), networks (FW, routers, etc.), and security applications (SD-WAN, Zero Trust solutions, etc.).

You possess considerable expertise in hardware (Dell, Fujitsu, HP etc.), and in TCP/IP, cloud services, Windows, data security, certifications, network settings (CCNA) and backup technologies.

Moreover, you are an experienced project manager and good at explaining your work. You know that any good solution needs to be preserved to be sustainable and take care to provide diligent documentation for various purposes and stakeholders. To make things perfect, you have a business-fluent or (near-) native command of English. If you know (a bit of) Japanese or German, even better.

BENEFITS&OTHERS

Scope:

- Parttime (20 hrs/ week or less on ideally 5, at least 3 days/ week)
- 12 months with option for extension to unlimited fulltime or parttime contract thereafter
- Location: Düsseldorf
- Starting Date: ASAP

Apply online or feel free to contact me directly for more information about this opportunity.
