募集要項

Company and Job Overview

A distinguished multinational corporation specializing in environmental home appliances, this company is renowned for its commitment to enhancing quality

Job Responsibilities

- Spearhead and contribute to mobile application development, ensuring seamless integration with backend systems and architectural consistency.

- Architect, implement, and integrate RESTful APIs to facilitate efficient communication between internal and external platforms, enabling smooth data flow and process automation.

- Diagnose and resolve production-level issues, including bug fixes and performance challenges, to uphold application reliability and enhance user experience.

- Engage in system architecture and design discussions, offering scalable and maintainable solutions that support long-

term system health and performance.

- Build and sustain enterprise-grade Java applications that underpin core business functions and digital transformation efforts, delivering resilient and scalable software solutions essential to operational success.

Job Requirements

- Possess a Bachelor's degree in Computer Science, Information Technology, Software Engineering, or a closely related discipline.

- Minimum of 5 years of professional experience in developing applications using Java technologies.

- Proficient in core Java programming, with hands-on expertise in the Spring Framework, mobile application development, API integration, and database management systems.
