## 募集要項

## **About The Company**

Ever wonder: "why does my 5 year old phone seem smarter than this 3M yen new car?"

We are currently looking for a Senior Project Manager to champion and revolutionise the way people interact with their cars, addressing both the challenges facing our climate and our business needs.

- · Start-up culture
- · New ideas are embraced to challenge the impossible
- Wearing ties is TABOO
- · YET with the backing of a Japanese auto giant

#### Who Are You?

- An experienced Project Manager
- · A strong knowledge of software development
- · Can collab with our new grads and pitch the CEO our next big move
- · Passionate about how tech can make driving better

#### Why you should apply:

- You will be a part of a diverse team coming from over 20 different countries
- . While developing driving technology that directly impacts millions' day to day life
- Making driving safer, smarter and more exciting

We have a fun, collaborative environment that encourages innovation and promotes ongoing learning to better our team.

## スキル・資格

### Requirements

- 3+ years of experience in end to end Project Management / Consultant
- . Software development life cycle expertise
- Native or fluent Japanese (N1 level) together with business level English skills
- Degree in Business Administration, Economics, Engineering, or Computer Science
- Excellent communication skills / ability to collaborate with stakeholders across all levels

### Bonus points if you have

- · Automotive experience
- Extra qualifications ( PMP, Prince2 , MBA , Doctorate )
- Have worked with cloud-based solutions (e.g. AWS , GCP )
- Served as a Scrum Master, ideally in large agile projects or scaled frameworks
