## 募集要項

This role involves engaging with enterprise customers across APAC to design tailored technical solutions that support digital transformation and AI initiatives. The successful candidate will bring deep expertise in cloud, infrastructure, and cybersecurity, along with strong pre-sales and stakeholder engagement skills.

## Client Details

A U.S.-based global technology provider specializing in networking, cloud, edge computing, and cybersecurity. With decades of industry experience, the company plays a major role in supporting digital transformation and AI adoption.

## Description

- Engage with customers to understand their needs and design tailored technical solutions.
- Support sales teams by providing expert advice and helping create strong proposals.
- Coach junior team members and deliver training to build skills.
- Contribute to strategy, explore new technologies, and build partnerships.

## Job Offer

Hybridwork  
Professional Development  
Family and Parenting Support
