募集要項

【ABOUT THE COMPANY】

Due to social changes such as the declining labor force and technological development in recent years, the time has come when everyone can choose their own way of life and work.
In such an era when “individual power” is important, the company develops the following businesses with the mission of creating a “growth ecosystem” that supports all those who are making efforts to get closer to their dreams. doing.

・ HR Tech business
・ Conversation Tech business

・ Incubation business

【JOB DESCRIPTION】

The company has established "Givery AI Lab" to implement AI that solves the true challenges of its customers into society.
Givery AI Lab is a "co-creative lab development institution" that comprehensively supports development projects utilizing generative AI, and it is involved in a wide range of activities, from promoting projects with clients to AI implementation and AI Agent development in its own products (Track / DECA / MANA).
It is a cutting-edge environment, both technically and business-wise, where you can take on the challenge of AI development leveraging the company's own data infrastructure.

▼ Project Example
＜Selection Environment Construction: Regional Bank＞
Construction of a dedicated in-house environment with the aim of "linking generative AI with in-house data in an offline work environment" and "reducing the hurdle to adoption" for maximum utilization of generative AI.
● Implementation Details
Hands-on support for introduction and utilization (advice & consulting)
Construction of a dedicated in-house AI assistant
● Achieved Results
Expected annual reduction of approximately ¥1.2 billion

【Responsibilities】
As a member of Givery AI Lab, you will be involved in development support such as identifying issues, conducting PoCs, implementing proprietary AI, internalizing AI, and evaluating and improving AI accuracy.
・Planning AI utilization methods tailored to customer use cases, from ideation to PoC development.
・Implementing optimal interfaces (conversation design) and data連携 (renkei - collaboration, linking) for users.
・Formulating development roadmaps and collaborating with stakeholders.
・Continuously evaluating and improving AI accuracy.

▼Position Highlights
・Flexible Work Style with Fully Remote × Flextime (Office Commuting Also OK!)
You can flexibly choose your work location and hours, creating an environment where you can balance your hobbies and family!
With almost no overtime, work-life balance is excellent ◎

・Stimulating Daily Life with Highly Skilled Colleagues
Many excellent engineers, including those from GAFAM, are part of the team, creating an environment with very high technical standards.
You can learn various technologies, including AI, leading to skill enhancement!

・Proactive in Launching New Businesses & Challenging Field
The company is proactive in launching new businesses, with many opportunities for 0 to 1 challenges.
Even Givery AI Lab's in-house SaaS was proposed by an intern, and the project has started.
Additionally, there is a bi-annual evaluation cycle that leads to fair evaluation of your skills and efforts, creating an environment where growth directly translates into career and compensation.

▼ Languages Used ※No specific language is required, but the following are the primary languages used in projects:
Frontend: TypeScript, React
Backend: Python
Database: PostgreSQL (RDS), MySQL
Framework: Flask
Infrastructure: Azure, AWS, GCP

【WELFARE】

Full Social Insurance
Commuting Allowance
Family Allowance

【HOLIDAYS】

Saturday/Sunday/National Holiday
Annual Paid Leave
New Year Holiday
Parental Leave
etc.

スキル・資格

【Required】
・2+ years of implementation experience using Python.

【Preferred】
・Development experience in AI and machine learning, etc.
・Experience in building/handling AI models related to natural language processing.
・Knowledge of statistics and machine learning, and experience in analysis using them.

【Recommended For Those Who】
・Enjoy developing in a team.
・Willing to incorporate the latest technology trends and improve their skills.
・Able to work independently and deliver value even in a remote environment.
