募集要項

Job Title: Signal Integrity (SI) Tester

Reports To: SI Manager

Location: Bac Ninh

Job Summary:

The SI Tester is responsible for executing signal integrity testing and measurement activities for high-speed interconnect products. This role involves hands-on testing, data analysis, and lab maintenance to ensure product performance meets design and quality standards.

Key Responsibilities:

Testing & Evaluation

- Perform signal integrity tests using frequency-domain and time-domain methods (e.g., S-parameters, TDR).
- Operate and calibrate test equipment such as Vector Network Analyzers (VNA), oscilloscopes, and other RF/digital

test tools.

- Conduct prototype evaluations and component assembly for testing purposes.
- Analyze test data and generate detailed reports for engineering review.

Documentation & Data Management

- Maintain accurate and organized test records on the company network.
- Document test setups, procedures, and results in accordance with internal standards.
- Support root cause analysis and troubleshooting based on test outcomes.

Lab Organization & Equipment Maintenance

- Ensure the test lab is well-organized, clean, and compliant with safety standards.
- Monitor and maintain calibration schedules for test equipment.
- Assist in inventory management of lab tools and components.

Qualifications:

Education

- Junior college diploma or Bachelor's degree in Electronics, Telecommunications, or related field.

Experience

- Minimum 3 years of hands-on experience in signal integrity testing or RF/digital component testing.
- Proficient in using VNA and other high-speed signal testing equipment.
- Familiarity with testing cables and connectors for high-speed applications is preferred.

Skills & Competencies

- Strong understanding of signal integrity principles and measurement techniques.
- Ability to interpret technical drawings and specifications.
- Good organizational and documentation skills.
- Team-oriented with effective communication abilities.

Additional Information:

- This role may require occasional overtime or weekend work depending on project timelines.
- Training will be provided for specific tools and procedures as needed.
