募集要項

Our client is a reputable multinational energy solution provider with a strong regional presence and focus on power plant services. As part of their business expansion into new energy segments, they are seeking **Technical Support Engineer (Mechanical & Electrical)** to be responsible for projects involving outages, overhauls, technical services, field execution activities and quality & safety compliance.

Key Responsibilities: -

- Execute power plant maintenance, overhauls and site activities according to project plans
- Prepare technical documents: service reports, technical proposal drafts, RSPL, ITP, BOM, DOW, technical drawings and check sheets
- Support in technical troubleshooting, vendor management and customer technical queries
- Collaborate closely with internal and safety team to ensure quality and safety compliance during site execution
- Work with Contract Administration team on vendor quotations and scope clarifications

Requirements: -

- **Degree in Engineering (Electrical / Mechanical)**
- Max 5 years of experience in the power or energy industry
- Strong technical knowledge, proactive and team oriented
- Fluent in English with good problem solving and coordination skills
