### 募集要項

**Key Responsibilities**

- Develop and maintain embedded firmware for advanced networking products.
- Integrate modern networking protocols and technologies into embedded systems.
- Investigate and resolve software issues reported by clients.
- Collaborate with cross-functional teams to enhance product quality and performance.
- Participate in code reviews and contribute to ongoing process improvements.

**Requirements**

- Bachelor's degree in Computer Science, Information Technology, Electronics, or a related field.
- From 1 to 5 years of hands-on experience in embedded software development using C/C++.
- Strong knowledge of Linux-based programming and networking protocols such as TCP/IP, DHCP, etc.
- Experience with embedded system architecture and debugging tools.
- Familiarity with version control systems like Git.
- Effective communication skills in English, both written and verbal.
- Ability to work independently and collaboratively in a team environment.

**Preferred:**

- Experience working with Real-Time Operating Systems (RTOS).
- Understanding of wireless communication standards such as Wi-Fi and LTE.
- Exposure to Agile/Scrum development practices.

**Benefits:**

- Competitive salary, negotiable based on experience and language proficiency.
- 13th-month salary and annual performance evaluations.
- Full social insurance, trade union benefits, and Tet holiday bonuses.
- Supportive and growth-oriented work environment with career development opportunities.
