募集要項

We are seeking a Engineer to support field testing and technical validation for a new, rapidly expanding food delivery service. This role combines onsite testing with technical documentation and partner collaboration

Client Details

Our client is a global Fortune 150 technology-driven company expanding innovative consumer services in Japan. Leveraging advanced logistics and platform solutions, they are committed to delivering speed, reliability, and customer-focused excellence to urban markets

Description

- Plan and conduct field tests at restaurants, retail partners, and other operational sites.
- Document findings with detailed technical reports.
- Support setup and troubleshooting of app and service operations during tests.
- Collaborate with partner businesses to ensure smooth operations and gather technical feedback.
- Assist in maintaining strong, reliable relationships with external partners.

Job Offer

- Exciting role in a global tech-driven company expanding into Japan.
- Multilingual and multicultural working environment.
- Clear opportunities for skill growth in testing, QA, and field engineering.
- Chance to work on a high-visibility consumer service from launch stage.

If you are passionate about quality assurance and excited to contribute to a technology-focused team, we encourage you to apply today!

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Zhixian Li on +81364021509.

スキル・資格

Must-have skills:

- Bachelor's degree in Computer Science, Electronics, or a related field.
- Basic understanding of internet/network technologies (e.g., HTTPS, API calls, communications).
- Strong organizational skills and attention to detail.
- Communication ability in Japanese and English (business level).

Nice-to-have skills:

- Experience in e-commerce, consumer apps, or service testing.
- Knowledge of QA / field operations.
- Additional language skills (Chinese or Korean).

会社説明
