# 募集要項

## [Role and Responsibilities]

- Able to read, write, and speak in both Japanese & English languages to establish good coordination and communication with Customer, Onsite and Offshore teams.
- Actively involved in the primary responsibilities that include but not limited to:
- Design, implement, and manage CI/CD pipelines using Jenkins, GitHub, and related tools for web and backend services.
- Build and maintain infrastructure as code (IaC) for cloud (OpenShift) and hybrid environments.
- Automate deployment, testing, monitoring, and rollback processes across development, QA, and production stages.
- · Collaborate with application, QA, and infrastructure teams to troubleshoot build, deployment, and runtime issues.
- Integrate security, quality, and compliance checks into the CI/CD lifecycle.
- Manage version control, branching strategies, and package management (NPM, VS Code ecosystem).
- · Assist teams with onboarding and best practice adoption, maintaining documentation in both Japanese and English.
- Actively contribute towards various Transformation initiatives (Process maturity, DevOps automation, etc.) to achieve
  the project goals
- Mentoring and guiding junior team members while assigning and tracking the tasks for closure without any schedule, quality and cost slippages

## Requirements;

- JLPT N3 or above certified. Able to read, write, and communicate in Japanese with native speakers
- 5+ years in DevOps and automation engineering roles.
- Strong experience with CI/CD (Jenkins, GitHub), container orchestration (OpenShift), and automation scripting.
- Strong expertise in AWS cloud services and architecture

### [Plus if you have]

- Experience integrating testing tools (Playwright, Load Runner) in DevOps pipelines.
- · Security certification or experience with DevSecOps.
- Experience managing deployments for Java/NodeJS, React/Angular, and COTS platforms.
- · Actively involve in Application transition and stabilization phases
- Familiarity with insurance industry requirements (data privacy, uptime, regulatory integration).
