### 募集要項

#### 【job Responsibilities】

- Own and manage large, complex programs or multiple projects across product and engineering teams.
- Define program vision, mission, success metrics, and drive measurable outcomes.
- Partner with engineering leaders to ensure architectural scalability and alignment with business goals.
- Influence roadmap planning, prioritization, and resource allocation across functions.

- Anticipate risks, resolve ambiguity, and mitigate potential roadblocks before they escalate.
  - Drive alignment between business and technical stakeholders through structured discussions and crisp decisions.
  - Oversee cross-team collaboration, ensuring effective execution, quality, and delivery.
  - Streamline processes, reduce dependencies, and foster innovation by removing architectural or operational bottlenecks.
  - Regularly review metrics and create mechanisms for visibility into progress, risks, and outcomes.
  - Communicate effectively with senior leadership (Directors, VPs, Founders, Investors) via narratives, roadmaps, and status reports.
  - Mentor and guide peers, engineers, and managers; contribute to building a culture of high performance and collaboration.
- 

## スキル・資格

### **[Necessary Skills / Experience]**

- Proficiency in Japanese (spoken and written) to collaborate effectively with Japan-based teams.
  - Bachelor's or Master's degree with 4 to 6 years of technical program management experience.
  - Proven experience leading large-scale, cross-functional projects with multiple stakeholders.
  - Strong technical breadth in system architecture and scalable tech stacks.
  - Ability to define technical direction in ambiguous business contexts.
  - Proficiency with program management tools across the requirements-to-delivery lifecycle.
  - Excellent written and verbal communication skills in English.
  - Strong decision-making, negotiation, and consensus-building skills.
  - A proactive team player who thrives in an extremely fast-paced environment.
-
