募集要項

This is an exciting opportunity for a skilled Data Engineer to work in the Financial Services industry, focusing on analytics in a permanent role. Based in Tokyo, you will contribute to building and optimizing data systems to support business insights.

Client Details

The company is a respected player in the Financial Services industry, recognized for its commitment to innovation and technology. Operating as a medium-sized organization, it offers employees a structured yet flexible work environment to excel in their roles.

Description

- Design and implement scalable data pipelines for analytics and reporting.
- Collaborate with cross-functional teams to understand data requirements and deliver solutions.
- Maintain and optimize database performance for efficient data retrieval.
- Develop and enforce best practices for data governance and security.
- Integrate data from various sources into centralized data warehouses.
- Monitor data systems to ensure consistent performance and reliability.
- Support the automation of data processes for improved efficiency.

- Assist in troubleshooting and resolving data-related technical issues.

Job Offer

- Competitive salary ranging from JPY 5400000 to JPY 6600000 annually.
- Standard benefits package, including health and wellness programs.
- Generous holiday leave policy to support work-life balance.
- Collaborative company culture encouraging innovation and professional growth.
- Opportunity to work on exciting projects in the Financial Services industry in Tokyo.

Take the next step in your career as a Data Engineer by applying today!

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Victor Alesse.

スキル・資格

A successful Data Engineer should have:

- A strong educational background in computer science, engineering, or a related field.
- Experience with designing and maintaining data pipelines and ETL processes.
- Proficiency in SQL and familiarity with cloud platforms like AWS, Azure, or GCP.
- Knowledge of big data tools such as Hadoop, Spark, or Kafka.
- Strong problem-solving skills with a focus on delivering effective solutions.
- Ability to work collaboratively in a team environment within the analytics department.

会社説明

Our client is a Tokyo-based fintech firm that has redefined online payments for the Japanese market. With a mission to simplify consumer finance, they offer a seamless checkout experience that doesn't rely on traditional credit cards-making online shopping more accessible and flexible for millions of users.

The company operates at scale, processing high-volume transactions in real time using advanced data infrastructure and machine learning. Backed by a globally recognized payments leader, they combine the agility of a startup with the stability of a multinational. Their engineering culture emphasizes autonomy, innovation, and collaboration across cross-functional teams.

This is an exciting opportunity to join a data-driven organization where your work will directly impact product development, risk modeling, and customer experience.
