【What we are aiming for in Digital Transformation】
An opportunity with USJ's Digital and Technology team is an experience like no other. From developing state of the art theme park locations in Orlando Hollywood Beijing and Japan to new destinations like our Halloween Horror nights themed destination in Vegas and a kids park in Frisco… our teams are at the heart of the new and innovative digital technologies that power our guest and team member experiences.

In this role you will be responsible for working with our business partners and product teams to understand the requirements that drive the technology solutions we will deploy and analyze key requirements needed. You will engage in the testing cycles of those solutions to align and drive that the design meets the original set of expectations. You are part of a global team that is consistently looking at ways to enhance the experience for guests from planning their trip to their in park visit to their post return all while driving the best experience all around.

As part of the Digital and Technology team you will work in a global and multinational team atmosphere with team members that come to work with us from various countries. You will engage with not only team members but with multinational vendors that support our destinations and experiences across the globe. So be prepared as our primary language to operate in is English daily; however having other languages like Japanese is a plus for local communications.

After joining the company you will gain a basic understanding of the latest technology for our theme parks and overall in park ride solutions. Not to worry we will work with you to refine your business system analysis skills. Your role will be responsible for reporting to management both in Japan and within the US. Regardless of your length of service you will be involved in operations with other parks around the world and will be able to grow significantly.

Examples of projects or the kind of projects you may engage in include but are not limited to:

Commerce Platform
Ticketing and Access Control systems
Web and Mobile application development
Gaming and new technologies innovations that connect the guest at home and in park
Photo validation technologies
Ride Reservation platforms
Food and Beverage platforms
Character digitally connected experiences and the list goes on.

So come join the fun with destinations all around the world Universal Destinations and Experiences Digital Technology team has multiple ways to immerse you in our brand while growing your career.

スキル・資格
