募集要項

While this service is growing steadily, we need a more robust and scalable system to drive further growth. We are also committed to providing the best user experience possible. This requires a stronger team and higher engineering skills, and we need more Frontend engineers to work with us as part of our development team.

Position Details

- Define requirements, design, programming, testing, and deployment to deliver the system.
- Collaborate with PDM, internal members, and upstream/downstream system teams.
- Monitor system stability and performance, optimize performance, design and maintain system architectures, refactoring, optimization, and troubleshooting.

スキル・資格

Mandatory Qualifications:

- Development experience with Javascript, HTML, CSS for more than 5 years
- Development experience with React.js OR Node.js
- Deep understanding of frontend performance optimization
- Knowledge of Web security
- Experience of system design
- Experience of testing (Unit Test, Integration Test)
- Business level English

Desired Qualifications:

- Experience with ESLint
 - Experience with unit testing implementation in JavaScript (Jest, Intern, WDIO)
 - Ability to design front-end architecture
 - DevOps experience
 - Experience of Git
-
