募集要項

While this service is growing steadily, we need a more robust and scalable system to drive further growth. We are also committed to providing the best user experience possible. This requires a stronger team and higher engineering skills, and we need more Frontend engineers to work with us as part of our development team.

Position Details

- Define requirements, design, programming, testing, and deployment to deliver the system.

- Collaborate with PDM, internal members, and upstream/downstream system teams.

- Monitor system stability and performance, optimize performance, design and maintain system architectures, refactoring, optimization, and troubleshooting.

スキル・資格

Mandatory Qualifications:

- Development experience with Javascript, HTML, CSS for more than 6 years

- Development experience with React.js OR Node.js

- Deep understanding of frontend performance optimization

- Knowledge of Web security

- Experience of system design

- Experience of testing (Unit Test, Integration Test)

- Business level English

- Business level Japanese (JLPT N2)

- Experience leading a team of 3 engineers ideally in a Japanese speaking environment

Desired Qualifications:

- Experience with ESLint

- Experience with unit testing implementation in JavaScript (Jest, Intern, WDIO)

- Ability to design front-end architecture

- DevOps experience

- Experience of Git
