募集要項

Key Responsibilities

The core duties are split between managing operations, optimizing costs, and ensuring quality and compliance:

- Oversee and manage production operations and personnel to ensure output meets scheduled targets and quality standards.
- Ensure the products meet both customer-defined quality standards and internal quality requirements.
- Drive process improvements and manage costs to optimize production efficiency and quality.
- Responsible for production planning, inventory control, and materials control to prevent shortages and minimize waste.
- Prepare and analyze various reports for management.
- Ensure all production and related activities adhere to ISO standards.

Requirements:

- Bachelor degree in Engineering or any related field.
- Proven experience in a Manufacturing environment with a background in either Production or Procurement/Logistics with production.
- Japanese communication skills at a Business Level and must be able to write and communicate via email (No JLPT

Required) with intermediate English is considerable.

- Proficient in MS Excel.
- Ability to work well with others and manage a team.
