募集要項

Position: PLC Engineer

Salary: 30,000 – 50,000 THB/Month

Location: Rojana Industrial Park, Ayutthaya

Responsibilities:

- Write and test PLC programs for controlling automation systems.
- Develop HMI programs to enable users to easily control and monitor machine status.
- Research and develop new technologies used in manufacturing processes, such as automation systems, Artificial Intelligence (AI), or robotics.
- Design and develop solutions related to implementing technology in manufacturing processes, such as automation systems and quality control systems, including training personnel on technology usage.

- Troubleshoot and modify control programs or control equipment when issues arise.
- Install PLCs, sensors, control devices, and perform full system commissioning (testing the operation of the entire machine before handover).
- Analyze manufacturing processes and propose methods to increase efficiency and optimize control systems to reduce cycle time or save energy.
- Ability to design Jigs and Fixtures for manufacturing processes.

Qualifications:

- Bachelor's degree in Electrical & Mechatronics Engineer, or a related field.
- 3 years of experience in PLC Programming
- Strong knowledge of Ladder Diagram, Structured Text, Function Block Diagram
- Strong design electrical diagram
- Strong communication and collaboration skills
