募集要項

A Global Real estate firm is looking for a **Lead Backend Engineer (Laravel)**. You will be responsible for developing, maintaining, and optimizing backend systems that power our internal tools, mobile apps, and websites.

You will also contribute to defining, refining, and enforcing backend development standards, ensuring architectural consistency across systems and services.

In addition, you'll help propose and evaluate new technologies and tools, playing an active role in technical decision-making that impacts multiple products and future platform evolution.

Working closely with frontend, mobile, QA, and SRE/DevOps teams, you'll ensure our systems are reliable, performant, and scalable for the needs of our growing ecosystem.

Responsibilities:

- Design, build, and maintain APIs and backend services using Laravel
- Collaborate with frontend, mobile, QA, and SRE/DevOps teams to deliver high-quality, well-integrated solutions
- Define, document, and help enforce backend coding standards, architectural patterns, and best practices
- Write clean, maintainable, and testable code following Laravel best practices
- Implement automated tests (unit, integration) and participate in code reviews
- Work with MySQL databases: design schemas, write optimized queries, and ensure data integrity
- Integrate and maintain connections with external APIs and internal systems
- Participate in Agile sprints and contribute to technical discussions and planning
- Leverage AI-assisted tools to improve code quality, testing efficiency, and documentation
- Support deployment and CI/CD processes to ensure smooth releases

Why should you apply:

- Opportunity to work for an exciting & international company
- Utilize Laravel knowledge to focus on Backend development
- Good base salary + transport, overtime and hybrid WFH workstyle

Company Details:

A global real estate space-sharing firm founded in 2010 with the vision to build beautiful office spaces where people and companies come together to get inspired and do their best work. Since opening our first location in New York City, we've grown into a global network of intentionally designed workspaces grounded in community. Today, we're constantly reimagining how space, technology, and community can help everyone—from freelancers to Fortune 500s—get more out of their workday.

Working Hours: 09:00 - 18:00 Mon-Fri

Working Style: Hybrid (2-3 days in office, other WFH)

Holidays: Saturday, Sunday, and National Holidays, Year-end and New Year Holidays, Paid Holidays, Other Special Holidays etc

Services/Benefits: Skillhouse provides a generous benefits plan including annual paid vacation, paid transportation, pension, healthcare, unemployment and disability insurance contributions, training opportunities, test pay back programs etc.

スキル・資格**Required Skills:**

- 4+ years of professional experience as a backend or full-stack engineer
- Strong expertise with Laravel and PHP (OOP, MVC, Eloquent ORM)
- Solid understanding of database design and optimization (MySQL)
- Experience building RESTful APIs and handling authentication and authorization flows
- Familiarity with Git and Agile development processes
