募集要項

A company in the system development and consulting industry is hiring for a Programmer position.

Job Description

- Design, develop, and enhance internal systems and applications used by group companies.

- Modify and improve functions for in-house portal sites and business applications.

- Develop and maintain production management systems used in manufacturing plants across Japan.

- Conduct system design, programming, debugging, and testing as part of team-based projects.

- Collaborate with users from various departments to meet system requirements and propose effective technical solutions.

Job Requirements

- System development experience (language or duration not strictly required).

- Over three years of system development experience using PHP, C#, JavaScript, or HTML.

- Japanese language proficiency and experience working with Japanese companies are advantageous.

- Strong teamwork, communication, and problem-solving skills.
