### 募集要項

Our client is a digital innovation hub that combines advanced data science, AI, and cloud technologies to create intelligent, scalable solutions for real-world business challenges. Their teams work across industries to turn data into actionable insights that drive smarter decisions and measurable impact.

They are looking for an experienced **Senior Security Engineer** to strengthen security across our cloud-based systems and DevOps environments. You'll play a key role in defining secure development and deployment practices, conducting architecture and code reviews, and driving "shift-left" security initiatives across multiple agile teams. This role offers the opportunity to shape security strategy while remaining hands-on with tools, automation, and architecture.

**Key Responsibilities**

- Define and implement secure CI/CD and continuous delivery processes.
  - Establish and maintain security requirements for cloud infrastructure and DevOps pipelines.
  - Conduct security architecture reviews, code assessments, and threat modeling.
  - Review and enhance application security controls and configurations.
  - Develop and enforce secure coding policies, procedures, and standards.
  - Collaborate with engineering teams to integrate security checkpoints into the SDLC.
  - Support automation of compliance, monitoring, and alerting systems.
  - Contribute to incident response planning, forensic analysis, and security testing.
- 

## スキル・資格

**Qualifications:**

- Minimum **4 years of experience** in **cybersecurity**, including areas such as secure engineering, consulting, **SOC operations**, or **DevOps security**
- At least **2 years of leadership experience**, managing or mentoring security teams and driving key initiatives
- Strong **penetration testing** expertise; certifications such as **OSCP** or **CEH** are a strong plus
- Hands-on experience with **vulnerability management** and a deep understanding of **secure engineering principles**
- Working knowledge of **public cloud environments** (**Azure**, **AWS**, **GCP**, etc.)
- Experience using **SAST** and **DAST** tools to identify and mitigate security risks
- Solid understanding of **vulnerability and compliance management**, **patch management**, **anti-malware**, **APT defense**, and **identity and access control** solutions
- Skilled in **threat modeling** and proactive risk assessment
- Familiar with **Agile methodologies** and comfortable working in fast-paced, collaborative environments
- Excellent **communication** and **interpersonal** skills, with the ability to partner across teams
- **Business level English** (TOEIC 800+) and **conversational Japanese** (JLPT N3 or above)

**Certifications:**

- **CISM**, **CISSP**, **CISA**, or **GIAC** (Information Security Management)
  - **CEH**, **LPT**, **CEPT**, or **GIAC Penetration Tester** (Ethical Hacking)
  - **CCSK**, **CCSP**, or cloud provider certifications ( **Azure**, **AWS**, **GCP** )
  - **OSCP** or **OSCE** (Offensive Security)
-
