募集要項

Company

Our client is part of a leading food and service group operating in more than 30 countries. In Japan, the team is expanding its Digital and Technology department to strengthen data capabilities and enable faster, insightdrive decisions across the business. They're seeking **Business Intelligence (BI) Engineers** to support data pipeline development, reporting automation, and other business intelligence initiatives using **Microsoft Fabric, Power BI, and SQL**.

The Role

As a **Business Intelligence (BI) Engineer**, you will play a key role in building the company's data foundation improving the accessibility and reliability of information across teams. You'll develop and maintain data pipelines, automate reporting, and deliver actionable insights that drive performance and efficiency. Working closely with local stakeholders, you'll help create scalable, data-driven systems that support smart decision making throughout the organization.

Key Responsibilities:

- Gather reporting requirements from stakeholders.
- Build and maintain **ETL/ELT** pipelines in **Microsoft Fabric** (Dataflows, DataPipelines, Lakehouse)
- Create and manage **Power BI** dashboards to visualize KPIs and deepen business insights
- Lead data quality enhancement and data pipelines creation initiatives
- Report and resolve data-related issues.
- Write **SQL** to extract, clean, transform, and model data
- Automate recurring reporting tasks and improve data workflow efficiency
- Collaborate with business users to understand requirements and deliver actionable insights

スキル・資格

- Hands-on experience with Power BI (reports and basic DAX)
- Experience with **SQL / Data Pipelines** for data extraction, transformation, modeling, and load
- Ability and willingness to learn and adapt to new tools and technologies
- Native to **Business-level Japanese**

Nice-to-have Qualifications:

- Knowledge of **Microsoft Fabric** (Dataflows, Lakehouse, Pipelines)
- Understanding of ETL concepts (data cleaning, joins, schedules, quality checks)
- Interest in automation and data visualization
- English
