募集要項

As a member of our high-performing, English-speaking team, you will play a key role in ensuring the quality of products that serve millions of users.

- Create detailed test plans and strategies customized for each assigned project
- Analyze product requirements and proactively clarify any gaps or concerns
- Design, execute, and maintain comprehensive test cases based on deep domain knowledge and robust testing

methodologies
- Develop, implement, and maintain automated test scripts to enhance testing efficiency and broaden coverage
- Contribute to QA department initiatives aimed at improving processes, tools, and overall product quality
- Drive continuous improvements in testing practices and actively share knowledge and best practices across teams
- Provide mentorship, guidance, and onboarding support to junior or new QA team members

スキル・資格

Required Skills and Experience

- 3+ years of hands-on experience in software testing
- Strong knowledge of software testing methodologies, processes, and best practices
- Proficiency in API testing using tools like Postman or equivalent
- Practical experience in test automation using any framework and programming language
- Proven ability to create and implement effective test plans and test strategies
- Experience working in agile or cross-functional teams
- Familiarity with test and issue management tools such as Jira, TestRail, etc.
- Strong interpersonal skills, open-minded attitude, and a self-motivated approach to work

Preferred Skills and Experience

- ISTQB or JSTQB certification or equivalent practical knowledge
- Experience in leading QA teams ranging from small to medium size
- Experience in process improvement or QA process optimization
- A passion for challenges and solving problems from the ground up
- Experience in AI development and/or experience in using AI tools to improve development processes.
  Money Forward recently announced our AI Strategy roadmap which focuses on improving AI-driven operational efficiencies, as well as integrating AI agents into our products to deliver better value to our users.

Language Requirements

- English: Business communication skills (TOEIC 700+ or equivalent)
- Japanese: N3 level or above
