### 募集要項

#### «Job Description & Position Highlights»

- Integration work responsible for the integration, stabilization, and automation of Android-based in-vehicle navigation systems
- Challenging and rewarding work involving efficiency improvements and cutting-edge technology adoption through automation and AWS utilization
- Opportunity to hone technical skills by leveraging Linux and script development to lead integration tool operations
- Work at the Katsuta or Iwaki sites while developing a wide range of skills, including CI/CD and cloud knowledge

#### 【Job Responsibilities】

We are seeking an Integration Engineer to perform essential integration work for our in-car navigation systems, which utilize the Android OS. The role emphasizes process automation and exploring the use of AWS services for enhanced integration workflows.

- Integration: Perform integration and stabilization work for in-car navigation systems built on the Android OS.
- Automation: Focus on the automation of integration tasks to improve efficiency and reliability.
- Cloud Integration: Evaluate and consider using AWS (Amazon Web Services) for integration, build, or deployment improvements.
- Development: Utilize Linux and script development skills to support and maintain integration tools.
