募集要項

≪**Job Description & Position Highlights**≫

- Integration work responsible for the integration, stabilization, and automation of Android-based in-vehicle navigation systems
- Challenging and rewarding work involving efficiency improvements and cutting-edge technology adoption through automation and AWS utilization
- Opportunity to hone technical skills by leveraging Linux and script development to lead integration tool operations
- Work at the Katsuta or Iwaki sites while developing a wide range of skills, including CI/CD and cloud knowledge

【**Job Responsibilities**】

We are seeking an Integration Engineer to perform essential integration work for our in-car navigation systems, which utilize the Android OS. The role emphasizes process automation and exploring the use of AWS services for enhanced integration workflows.

- Integration: Perform integration and stabilization work for in-car navigation systems built on the Android OS.
- Automation: Focus on the automation of integration tasks to improve efficiency and reliability.
- Cloud Integration: Evaluate and consider using AWS (Amazon Web Services) for integration, build, or deployment improvements.
- Development: Utilize Linux and script development skills to support and maintain integration tools.

【Employment Type】
Full-time, Permanent Employee

【Salary】
Based on experience and skill level

【Working Hours】
In accordance with company regulations

【Work Location】
Katsuta - Ibaraki

Iwaki - Fukushima

【Holidays & Leave】
In accordance with company regulations

【Benefits & Welfare】
In accordance with company regulations

スキル・資格

Qualifications
【Required】

- Japanese Level: N3 and above
- OS Experience: Experience with Android OS environment and system integration.
- Linux Development: Experience in Linux development environments.
- Scripting: Experience in script development (e.g., Shell, Python, etc.) for automation purposes.
- Integration: Experience in system integration work.

【Preferred Experience】

- Experience with AWS or other major cloud services.
- Experience in developing or maintaining Continuous Integration/Continuous Deployment (CI/CD) pipelines.
- Knowledge of in-car navigation or infotainment systems.
- Experience with version control systems like Git.
