### 募集要項

#### «Job Description & Position Highlights»

- Development work encompassing everything from investigating existing manufacturing systems to implementing new MES proof-of-concepts, functional development, and creating design specifications.
- Utilize C#/C and SQL to solve manufacturing challenges through technology, experiencing the satisfaction of making a tangible impact.
- Deepen expertise in field systems like MES and SCADA, gaining the fulfillment of contributing to operational improvements.
- Flexible work arrangements combining Tachikawa office and remote work, supported by a growth environment that prioritizes communication.

#### 【Job Responsibilities】

- Investigate and understand existing manufacturing systems.
- Become proficient with the new MES package.
- Conduct a PoC to transfer data to the new system, primarily using SQL.
- Develop sub-functions and interfaces using languages like C# and C as needed.
- Create design documents and other project-related documentation.
- Collaborate with the team, verbalize your thoughts, and seek help when needed.
