募集要項

Position: Supply Chain & Procurement Manager (Renewable Energy Project)

Salary: 80,000 – 120,000THB +/- (Negotiable)

Location: Bangkok

Our client is big brand Project of Renewable Energy Industry, (Solar)

Key Responsibilities of the position:

- Strategic Procurement and Sourcing
- Supplier Management: Identify, evaluate, select, and qualify key domestic and international suppliers (OEMs) for major renewable components, including solar modules, inverters, trackers, wind turbines, batteries (BESS), and balance of system (BoS) equipment.

- Negotiation: Lead complex contractual negotiations for large-volume purchases, ensuring optimal pricing, favorable payment terms, delivery schedules, and quality assurance.
- Cost Optimization: Develop and implement cost-saving strategies across the supply chain without compromising quality or project schedules. Conduct rigorous Total Cost of Ownership (TCO) analysis.
- Logistics and Inventory Management
- Logistics Planning: Oversee the entire logistics process, including international shipping, customs clearance, import duties, freight forwarding, and domestic transportation to project sites.
- Risk Mitigation: Proactively manage logistics risks, ensuring appropriate insurance coverage and contingency plans for delays or damages.
- Inventory Control: Manage inventory levels and materials flow to align with construction schedules, minimizing holding costs and preventing project delays.

Qualifications

- Bachelor's or Master's degree in Supply Chain Management, Logistics, Engineering, Business Administration, or a related field.
- Minimum of 5-7 years of progressive experience in Procurement, Supply Chain, or Strategic Sourcing, with at least 3 years directly focused on large-scale Renewable Energy or Power Generation projects.
- Skills: Excellent leadership, team management, and problem-solving skills. Strong written and verbal communication skills in English.
