募集要項

We are hiring a **Senior Java Backend Engineer (Tech Lead level)** to design, develop, and operate large-scale web backend systems for a major e-commerce marketplace. You will lead system design decisions, guide engineering teams, and ensure high availability during peak traffic events.

Client Details

The client operates Japan's largest online shopping marketplace, serving tens of millions of consumers. Engineers work in a highly challenging environment where performance optimization, system resilience, and continuous improvement are essential.

Description

- Understand business priorities and deliver high-quality backend services under tight schedules
- Lead backend architecture design for high-traffic web systems
- Make technical decisions considering scalability, maintainability, and long-term service growth

- Lead design, development, testing, and release of new and existing backend features
- Guide engineering teams and resolve complex technical issues

Job Offer

- **Compensation: Up to ~8M JPY (depending on experience)**
- Long-term contract (initial 2 months, then 3-month renewals)
- Senior, architecture-focused Java role
- High-impact system used by millions of users
- Weekends & holidays off
- Working hours: **9:00 - 17:30**

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

スキル・資格

- **Proven experience as a Technical Lead** for high-traffic web systems
- **5+ years of Java backend development experience (Java + Spring Boot)**
- Strong experience in **REST API design, development, JUnit testing, and code reviews**
- Production monitoring and troubleshooting experience
- Experience with **Oracle or MySQL**
- Experience using **Tomcat or WebLogic**
- Hands-on experience with **Linux, Git, Gradle**
- CI/CD experience using **Jenkins or similar tools**
- Experience using **Docker and Kubernetes** in system development
- **Business-level English communication skills**

会社説明

Our client is a leading global tech-driven organization committed to digital innovation and intelligent automation. The team operates in an English-speaking environment with engineers from diverse international backgrounds, promoting technical excellence and creative problem-solving.
