### 募集要項

The ideal candidate will be responsible for understanding technical requirements, communicating clearly with both client and internal teams, and ensuring timely and quality delivery. The candidate must possess a blend of technical expertise, communication skills, and coordination capabilities.

The ideal candidate will have a strong technical understanding of engineering services using multi- disciplinary competencies like Mechanical, Electrical, Electronics, IoT, Software etc

- Act as the primary point of contact between customer teams and offshore/remote development teams.
- Understand customer requirements, translate them into actionable tasks, and ensure technical feasibility.
- Prepare and deliver technical documentation, functional specifications, and meeting notes.
- Coordinate daily/weekly sync-up meetings, track action items, and follow up on dependencies.
- Ensure smooth communication flow and address any technical or process gaps between teams.

- Review deliverables from the development team to ensure they meet quality and specification standards.
  - Escalate issues in a timely manner and work collaboratively to resolve blockers.
  - Maintain project timelines, track progress, and support delivery management.
  - Build trusted, long-term relationships with customer stakeholders, acting as a strategic advisor and advocate for their needs.
  - Coordinate with internal teams (sales, delivery & support functions) to deliver tailored solutions and ensure seamless client experiences.
  - Understand and adapt to Japanese business etiquette, communication style, and decision-making processes.
  - Protects organization's value by keeping information confidential.
- 

## スキル・資格

- Bachelor's degree in Engineering
  - Overall experience of 8+ years
  - 5+ years of experience in technical coordination, project engineering in Japanese market
  - Excellent communication and interpersonal skills.
  - Business level Proficiency in Japanese (JLPT N3 or higher preferred) is a must.
  - Ability to manage priorities, multitask, and work independently.
  - Experience working with geographically distributed teams is preferred.
  - Experience in customer-facing roles.
  - Exposure to tools like JIRA, MS Teams, Trello, etc.
  - PMP/CSM certification is a plus.
  - Domain knowledge in Industrial products or Industrial Machinery or Plant engineering is a must
-
