募集要項

Our client is one of the market leaders in the power generation sector providing generators, turbines, transformers, and associated power infrastructure.

Responsibilities: -

- Managing and deliver high voltage power projects involving primary equipment and power transformers (132kV and above)
- Coordinate project execution, including technical reviews, vendor management, site activities and documentation
- Ensure compliance with engineering standards (IEC/ IEEE/ JIS), contractual requirements, safety, quality and schedule

- Liaise with customers, consultants, contractors and internal teams to resolve technical and project issues
- Monitor project progress and report status, risks and technical matters to management

Requirements: -

- Bachelor Degree in Electrical Engineering or related field
- Minimum 6 years of experience in high-voltage transmission, grid projects or power transformers
- Strong knowledge of primary equipment, international engineering standards and project execution
- Good communication, coordination and time management skills
- Fluent in English and Bahasa Malaysia, Mandarin is an advantage
- Proficient in MS Office, willing to travel when required
