募集要項

Company Overview: One of the leading Japanese MNCs providing construction services to clients right from planning to design and implementation.

Job Overview: Looking for experienced Mechanical Engineer - HVAC experienced in mechanical designs and having good experience in industrial projects.

Job Responsibilities:

- Design and Development: Develop detailed designs for mechanical systems, including HVAC, plumbing, fire protection, and other systems.
- Create and review technical drawings, plans, and specifications using CAD software. Experience in Revit / Rebro will be of additional advantage.
- Project Management: Coordinate with architects, structural engineers, and other stakeholders to integrate mechanical

designs with overall project plans.

- Plan and manage project schedules, budgets, and resources. Supervise and provide technical guidance to subcontractors and on-site personnel.
- Oversee the installation of mechanical systems, ensuring they are completed on time, within budget, and to the required quality standards.
- Conduct regular site inspections to monitor progress and ensure compliance with specifications and safety standards.
- Quality Assurance and Control: Perform quality control checks on all mechanical systems and components. Troubleshoot and resolve issues related to mechanical systems during construction and post construction.

Job Requirements:

- Diploma / Bachelor in mechanical engineering having 4-7 years' experience working at construction site in industrial projects.
- Proficient in using and reading drawing using AutoCAD for implementing the project work.
- Able to supervise and control the team.
- Strong in project management skills, with experience managing large-scale construction projects.
- Must be comfortable for travelling to anywhere in North India and West India.
