募集要項

Company and Job Overview

A leading international financial institution dedicated to delivering innovative banking and technology solutions.

Job Responsibilities

- Manage and deliver medium to large-scale regulatory and enterprise projects, ensuring timely execution and compliance with industry standards.
- Oversee testing, documentation, and release processes to maintain high standards and minimize rework.
- Gather and clarify requirements, prepare detailed documentation including BRD, FSD, and process maps, and align with established SDLC practices.
- Collaborate with regional teams, business units, and vendors to manage schedules, risks, and dependencies effectively.

- Implement vulnerability remediation, patching, and audit-ready documentation to uphold security standards.
 - Provide incident triage and ensure SLA compliance to maintain system stability and resilience.
-
- Identify opportunities for process optimization, cost reduction, and standardization.

Job Requirements

- Bachelor's degree in Software Engineering, Computer Science
 - 10+ years of experience in IT, min 5 years in Project management for enterprise-scale projects.
 - Strong proficiency in English
 - Excellent troubleshooting, communication, and organizational skills with attention to detail.
 - Database administration skills (MSSQL/Oracle) for performance tuning and system resilience.
 - Experience working in multinational environments and handling complex projects.
-
- Hands-on experience in business analysis, solution architecture, or security frameworks.
-
- Preferred certifications: PMP or equivalent, and relevant technical certifications.

Benefits

- Competitive compensation and performance-based incentives.
- Comprehensive health and accident insurance.
- Annual bonus and additional benefits aligned with industry standards.
- Professional development opportunities and a collaborative work culture.

Due to the volume of applications, only shortlisted candidates will be contacted. Thank you for your interest.
