### 募集要項

#### About the company

- Global firm that specializes in marketing tech, and operates various products/business such as an ad platform, marketing SaaS, digital PR and more
- One of the fastest growing companies (awarded in the Financial Times)
- Flexible, hybrid working style and international environment (both Japanese and English used)

#### Your role

Lead and oversee the design, development, and operation of backend systems, laying the technical foundation for next-generation solutions and work closely with cross-functional teams to enable continuous improvement.

### スキル・資格

**Looking for a candidate with (required qualifications)**

- Bachelor's degree in Computer Science, Software Engineering or similar
- Strong application development experience skills in Python
- Enterprise SaaS development background

**Plus (preferred qualifications)**

- Bilingual skills (Business Japanese and English)
- Experience with cloud services (AWS, GCP, Azure) and container technologies
- Knowledgeable and passionate about AI technologies
