#### 募集要項

We are seeking a self-motivated and creative Data Analyst/Engineer to join our team. You will work on innovative projects, collaborating with global teams to design and implement solutions that enhance our financial systems.

#### Client Details

Our client is a leading global financial institution, renowned for its comprehensive financial services and innovative technology solutions. The division plays a crucial role in supporting the firm's financial operations and risk management.

#### Description

- Collaborate with developers, teams, and business units to understand data processing intricacies
- Implement new data flows, test, and deploy them to production
- Design solutions using various technologies, optimizing processing and deployments
- Create and manage ETL jobs, ensuring performance and stability
- Define new features with product management and provide specifications
- Gain an understanding of accounting and finance reporting platforms
- Participate in hack days and contribute to DevOps, Cloud, and AI initiatives

**Job Offer**

- Opportunity to work with a global financial leader
- Professional growth and development in a dynamic and innovative environment
- Work in Tokyo, a vibrant and exciting city

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

---

**スキル・資格**

- - 2 to 5 years of experience in software development (Java/Scala, Python, Angular)
  - Proficiency with SQL and relational databases (Snowflake, Teradata, Sybase, DB2)
  - Working knowledge of Linux for navigation, deployment, and triage
  - Strong analytical and problem-solving skills
  - Excellent written and oral communication skills
