### 募集要項

Randstad is currently partnering with a global insurance company to support the hiring of a **Business Systems Analyst**. This role plays a critical part in bridging business needs and technical solutions, with a strong focus on system analysis, data design, and cross-functional collaboration.

#### Key Responsibilities

- Gather and clarify business and system requirements.
- Analyze existing systems and source data
- Work with development teams on implementation

- Support documentation and testing activities
  - Translate business requirements into functional and non-functional system designs
- 

## スキル・資格

- Bachelor's degree in Computer Science or related field, or equivalent practical experience
- 6–10 years of experience in system development or Business/System Analyst roles
- Proven experience delivering successful system or data-related projects
- Strong leadership and project coordination skills

## Technical Skills

- Strong system and data analysis skills (coding experience required)
  - Solid knowledge of databases such as Oracle, MS SQL Server, MongoDB
  - Experience with Linux environments and basic networking concepts
  - Strong understanding of data structures and data management
  - Exposure to modern data platforms and ecosystems (e.g. Hive, HBase, Spark, Zeppelin, Solr, Livy)
  - Excellent problem-solving abilities
-
