募集要項

Work Location: Kuala Lumpur

Employment Type: Permanent

Are you an experienced project management professional with a strong interest in building automation systems? Join our dynamic team and play a key role in delivering high-quality engineering projects across Malaysia.

We are looking for a **Project Engineer / Project Manager** to support and lead building automation projects, ensuring timely execution, quality delivery, and excellent customer satisfaction.

JOB RESPONSIBILITIES:

- Assist the Project Manager in managing projects efficiently and effectively.
- Develop and implement detailed project plans, schedules, budgets, and cost estimation.
- Monitor the full project lifecycle to ensure delivery meets time, cost, and quality requirements.
- Lead and manage the project team to meet project objectives and deadlines.
- Coordinate and collaborate with internal teams and external stakeholders (consultants, contractors, government agencies, etc.).
- Prepare and present project reports and updates to the Project Manager.
- Provide periodic updates on work progress, including progress claims.
- Attend site meetings and support the resolution of engineering or project management issues.
- Provide daily updates to the team on tasks and progress.
- Maintain high customer satisfaction through proactive communication and timely follow-up on concerns.
- Manage customer complaints professionally and escalate issues to superiors when needed.
- Ensure confidentiality and proper handling of customer information.
- Support the sales team in after-sales service, consultancy, and client relationship strengthening.
- Maintain strong communication and collaboration within and across departments.
- Ensure adherence to company policies, procedures, and compliance requirements.
- Perform any other tasks assigned by the superior as needed.

JOB REQUIREMENTS:

- Diploma or Bachelor's Degree in Project Management or a related field.
- Minimum 5 years of relevant experience in project management, preferably in construction or engineering projects.
- Technical knowledge in Building Automation Systems (HVAC, mechanical systems, control systems) is an added advantage.
- Strong leadership skills with the ability to lead site teams and coordinate with consultants and departments.
- Strong skills in planning, organisation, leadership, negotiation, problem-solving, and communication.
- A proactive, responsible, positive team player with strong interpersonal skills.
- Able to manage multiple tasks, prioritise workload, and work well under pressure.
- Willing to work primarily in Kuala Lumpur and Cyberjaya, with occasional travel to other project sites within Malaysia.
- Must possess own transport and a valid driving licence.

Why Join Us?

- Opportunity to work on impactful building automation and engineering projects
- Supportive team environment
- Career development and growth
- Exposure to diverse stakeholders and high-value projects

If you're passionate about delivering successful engineering projects and want to advance your career in the building automation field, we'd love to hear from you!
