3年以上

#### キャリアレベル

中途経験者レベル

#### 英語レベル

ビジネス会話レベル (英語使用比率: 75%程度)

#### 日本語レベル

日常会話レベル

#### 最終学歴

高等学校卒

#### 現在のビザ

日本での就労許可が必要です

### 募集要項

#### Role Overview

We are establishing a new **Site Reliability Engineering (SRE) team** to ensure the reliability, availability, and security of increasingly complex systems, including telecommunications APIs, payment platforms, and data infrastructure.

As an SRE, you will work closely with product and development teams to balance **system reliability and developer**

**productivity.** This is a core role in a high-growth phase, offering the opportunity to design and build the technical foundation from the ground up.

### Responsibilities

1. Design, build, and operate cloud infrastructure primarily on **AWS and/or Google Cloud**
2. Design and improve **CI/CD pipelines** (e.g., GitHub Actions)
3. Build and operate monitoring and logging systems (Cloud Monitoring, Datadog, etc.)
4. Incident detection, response, postmortems, and prevention of recurrence
5. Performance tuning and system optimization
6. Security initiatives (vulnerability management, access control, encryption)
7. Automate deployment and operations in collaboration with development teams
8. Continuous improvements for reliability, scalability, and cost optimization

### Tech Stack

- Mobile App: Flutter
- Frontend: TypeScript (Next.js)
- Backend: TypeScript (Node.js)
- ORM: Sequelize
- Database: MySQL (Cloud SQL)
- Infrastructure: Google Cloud Platform, Firebase
- CI/CD: GitHub Actions
- Design: Figma
- Version Control: GitHub
- Project Management: Notion, Miro
- Communication: Slack

---

### スキル・資格

#### Required Qualifications

1. 3+ years of experience building and operating infrastructure on **AWS or GCP**
2. Hands-on experience with **Infrastructure as Code** (Terraform or similar)
3. Experience operating containerized applications (Docker, ECS, Kubernetes, etc.)
4. Experience designing and automating **CI/CD pipelines**
5. Practical experience with monitoring, alerting, and incident response
6. Strong understanding of security, availability, and scalability principles
7. Ability to collaborate effectively with development teams

#### Preferred Qualifications

1. Experience designing and managing **SLOs / SLAs**
2. Performance optimization experience in large-scale web applications or SaaS
3. SRE experience in **Fintech, telecom, or global services**
4. Strong security or networking expertise
5. Team leadership or management experience

#### Language Requirements

- **Japanese:** Conversational level
  - Equivalent to JLPT N3-4 level or higher
  - Able to handle basic work conversations and chat communication
- **English:** Fluent

※Internal communication is primarily in Japanese, while English is often used for technical discussions.
