募集要項

◀ Job Description & Position Highlights ▶

- Responsible for investigating, verifying, and managing projects involving precision actuators, sensors, and other hardware technologies
- Directly contribute to cutting-edge hardware development through evaluating technical resources and collaborating with companies and universities
- Drive technical verification projects to hone expertise and problem-solving skills
- Stable work environment with a full two-day weekend system

【Job Responsibilities】

Suitable for either of the two positions is OK:

<Embodied Intelligent Hardware Engineer>

This role focuses on embodied intelligent hardware technologies, primarily involving precision end-effectors, precision actuators, precision transmission mechanisms, micro-motors, sensors, and other hardware components.

- Identify, collect, and analyze industry-related technical resources, and compile findings into structured reports.
- Communicate with companies and universities to confirm technical details, specifications, and feasibility.
- Match appropriate technical resources, initiate verification projects, and manage project progress.

<Precision Structural Bonding Engineer>

- Identify and gather industry-related technical resources based on technical problem requirements, and compile them into structured reports.
- Communicate with companies and universities regarding the selected technical resources to confirm technical details, evaluate the degree of requirement matching, and determine feasibility.
- For feasible technical resources, initiate projects for technical verification and manage project verification progress.

[Employment Type]

Permanent employee

[Salary]

Annual salary: ¥6,000,000 to ¥8,000,000

[Working Hours]

9:00 AM to 6:00 PM

[Work Location]

Yokohama, Kanagawa

[Holidays & Leave]

Two-day weekend system (Saturdays, Sundays, and national holidays)

[Benefits & Welfare]

In accordance with company regulations

スキル・資格

[Essential Requirements]

- Academic background in Mechanical Engineering, Automation, or related fields.
- Knowledge in precision end-effectors, precision actuators, precision transmission mechanisms, micro-motors, sensors, and other hardware-related areas.

[Welcome Requirements]

- Knowledge of adhesives such as UV adhesives, PUR adhesives, PSA adhesives, etc.
- Familiarity with surface treatment techniques for bonding interfaces (e.g., plasma treatment, primer treatment, roughening treatment).
- Understanding of bonding reliability testing and evaluation methods (testing equipment, testing procedures, etc.).

[About Selection Process]

- Number of Positions Available: 1
