募集要項**◀ Job Description & Position Highlights ▶**

- Responsible for investigating, verifying, and managing projects involving precision actuators, sensors, and other hardware technologies
- Directly contribute to cutting-edge hardware development through evaluating technical resources and collaborating with companies and universities
- Drive technical verification projects to hone expertise and problem-solving skills
- Stable work environment with a full two-day weekend system

【 Job Responsibilities 】

Suitable for either of the two positions is OK:

< Embodied Intelligent Hardware Engineer >

This role focuses on embodied intelligent hardware technologies, primarily involving precision end-effectors, precision actuators, precision transmission mechanisms, micro-motors, sensors, and other hardware components.

- Identify, collect, and analyze industry-related technical resources, and compile findings into structured reports.
- Communicate with companies and universities to confirm technical details, specifications, and feasibility.
- Match appropriate technical resources, initiate verification projects, and manage project progress.

< Precision Structural Bonding Engineer >

- Identify and gather industry-related technical resources based on technical problem requirements, and compile them into structured reports.
- Communicate with companies and universities regarding the selected technical resources to confirm technical details, evaluate the degree of requirement matching, and determine feasibility.
- For feasible technical resources, initiate projects for technical verification and manage project verification progress.

【Employment Type】

Permanent employee

【Salary】

Annual salary: ¥6,000,000 to ¥8,000,000

【Working Hours】

9:00 AM to 6:00 PM

【Work Location】

Yokohama, Kanagawa

【Holidays & Leave】

Two-day weekend system (Saturdays, Sundays, and national holidays)

【Benefits & Welfare】

In accordance with company regulations

スキル・資格

【Essential Requirements】

- Academic background in Mechanical Engineering, Automation, or related fields.
- Knowledge in precision end-effectors, precision actuators, precision transmission mechanisms, micro-motors, sensors, and other hardware-related areas.

【Welcome Requirements】

- Knowledge of adhesives such as UV adhesives, PUR adhesives, PSA adhesives, etc.
- Familiarity with surface treatment techniques for bonding interfaces (e.g., plasma treatment, primer treatment, roughening treatment).
- Understanding of bonding reliability testing and evaluation methods (testing equipment, testing procedures, etc.).

【About Selection Process】

- Number of Positions Available: 1
