#### 募集要項

This role focuses on developing full-stack applications that support sales and corporate access teams, translating business requirements into high-quality technical solutions. You'll work across modern web technologies while providing hands-on support to users in both English and Japanese.

#### Client Details

The employer is a large organization within the Financial Services industry, known for its innovative approach to technology and focus on delivering exceptional solutions. Based in Tokyo, the company is committed to leveraging advanced tools and methods to achieve business success.

#### Description

- Develop full-stack web applications using React or Angular, supported by backend languages such as Java, TypeScript, or Python.
- Translate business requirements into technical specifications and deliver clean, maintainable code with proper documentation.
- Implement automated tests (unit, integration, end-to-end) and contribute to CI/CD pipelines for stable, reliable deployments.

- Provide 2nd- and 3rd-level technical support, including database queries and source-code investigation, while collaborating with users in both English and Japanese.

#### Job Offer

- Opportunity to work with a large organization in the Financial Services industry.
- Exposure to cutting-edge technology and innovative projects.
- Collaborative and professional work environment in Tokyo.

Looking forward to your application.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

---

#### スキル・資格

A successful applicant should have:

- Demonstrates strong full-stack experience with React or Angular plus Java, TypeScript, or Python.
- Communicates effectively in both English and Japanese when working with stakeholders and end users.
- Writes clean, maintainable code and is comfortable with unit testing, code reviews, and CI/CD workflows.
- Works proactively, solves problems independently, and collaborates well within a cross-functional environment.
