【求人No NJB2315960】
Lillyは、世界中の人々のより豊かな人生のため、革新的医薬品に思いやりを込めて届けます。Lillyは、インディアナ州のインディアナポリスに本社を置く世界的なヘルスケア企業です。世界中にいる弊社の人の社員は、画期的な新薬を発見して、それを必要とする人々に届けること、疾病の理解と管理を改善すること、そして慈善活動およびボランティア活動を通じたコミュニティへの還元のために働いています。私たちは仕事に最善を尽くすと共に、人を第一に考えています。私たちは世界中の人々の人生をより良くしたいと強く思っている人を探しています。

職務概要/Overall Job Purpose:

Eli Lilly Japan K.K. is one of the fastest growing Pharma companies in Japan. It is also one of the largest affiliates for Eli Lilly and will continue to be one of the critical growth engines for Eli Lilly in the years to come.
Recent advances in technology provide new possibilities for enhancing customer experiences introducing new channels of engagement improving employee productivity while ensuring compliance and protecting key information assets. It is therefore natural to have increased expectation from IT to drive and make bigger contribution to our Japan affiliates and company's objectives.
There are multiple IT projects and programs being executed across all business functions to increase business value and/or improve process and people productivity. To ensure we are ready and able to deliver professionally on these expectations we want to strengthen our Solution Delivery capability with well trained contingent workers.

職務内容/Job Responsibilities:

The Solution Delivery Lead is responsible for leading the execution of the assigned portfolio of projects to

Build or implement solutions on plan and within budget with excellent "change management" issue resolution and communication.
Ensure business needs are appropriately converted into technical requirements and solution approach is aligned with IT stakeholders.
Ensure implementation of quality solution that meets the needs of the business following software development life cycle.
Manage vendor resources for optimal and quality delivery.
In addition the Solution Delivery Lead should demonstrate efficient project management practices and

Manage multiple projects simultaneously; proactively resolve roadblocks to achieve timely delivery of agreed scope.
Participate in the continuous development proactive improvement verification and enforcement of policies procedures standards and guidelines to ensure efficient and effective operational IT PMO practices.
Assist in monitoring and controlling Program level cost/resource management including resource planning and estimation.
Continually assess and adjust the project course through proactive communication change management and issue resolution.
Communicate value effectively and manage stakeholder expectations Articulate the value of the program and get alignment between business partners and IT teams to ensure program strategy is understood by key stakeholders.
