募集要項

Position Details

- Define requirements, design, programming, testing, and deployment to deliver the system
- Collaborate with PDM, internal members, and upstream/downstream system teams
- Monitor system stability and performance, optimize performance, design and maintain system architectures, refactoring, optimization, and troubleshooting

Mandatory Qualifications:

- 5 years of experience in Java/Spring Boot web application development (both Web and Batch)
- 5 years of experience in designing and developing REST APIs, with strong proficiency in JUnit testing and code reviews
- Experience in operating large-scale online systems and handling incident response
- Experience with relational databases (Oracle or MySQL)
- Hands-on experience using Tomcat or WebLogic

- Experience in Git, Linux, and Gradle
- Experience with CI/CD using Jenkins or other similar tools
- Knowledge and practical experience in container architectures such as Docker and Kubernetes, applied in system development

Desired Qualifications:

- English communication skills (Business level at least)
- Experience in leading design to consider overall system scalability and maintainability, and strategically guiding the future vision of services (user base expansion, new feature integration)
- Experience in conducting Performance/Load/Stress Tests, etc.
- Experience with Redis, Kafka, Elasticsearch, Grafana, and Kibana
- 3+ years of experience in PHP Application development using any framework
- Experience in environment setup using Kubernetes
- Kubernetes certification (CKA or CKAD) obtained
