募集要項

This mid-level Java Engineer role sits in the online payments development team, building high-performance, highly available systems for both consumers and merchants. You will work across multiple services, from checkout flows and merchant APIs to data platforms and onboarding tools, in a highly collaborative engineering environment.

Client Details

Our client is a leading Japanese fintech company within a major internet group, providing one of the largest online payment platforms for e-commerce merchants across Japan. Their services support thousands of online stores nationwide, and the online payment business is a core pillar in the group's growth strategy.

Description

As a mid-level engineer, you will join an experienced development team responsible for mission-critical online payment systems. Your main responsibilities will include:

- Designing, developing and maintaining Java-based web applications for online payments

- Building and improving high-performance, highly available systems for:
 - Consumer-facing payment flows
 - Merchant-facing API services
 - Merchant management and back-office systems
 - Large-scale payment data aggregation systems
 - New merchant onboarding and application systems
- Writing clean, maintainable code and contributing to code reviews and design discussions
- Working closely with product managers, QA and operations teams to deliver secure, stable, and scalable services
- Proactively identifying issues, proposing solutions, and driving continuous improvement in performance, efficiency and reliability
- Ensuring compliance with global security standards (e.g. PCI DSS) in collaboration with relevant stakeholders

Job Offer

- Opportunity to contribute to a high-impact online payment platform used by thousands of e-commerce merchants across Japan
- Exposure to large-scale, high-availability systems and global security standards such as PCI DSS
- A collaborative engineering culture that values ownership, problem-solving, and continuous improvement
- Clear career development opportunities, including the potential path to permanent employment (conversion not guaranteed)
- Bilingual environment where you can leverage and further strengthen both Japanese and English skills
- Stable yet innovative environment as part of a major internet/fintech group

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serena Wu on +81 3 6627 6137.

スキル・資格

The ideal candidate will have the following experience and skills:

Must-have:

- 3+ years of hands-on experience in Java web application development
- Practical experience in application development using SQL (1+ year)
- 2+ years of experience developing consumer-facing web applications
- Basic knowledge and experience with Linux/Unix environments
- Strong communication skills and the ability to build trustful relationships within the team
- Ability to make sound judgments and constructive proposals based on the situation
- Proactive, self-driven mindset with a strong sense of ownership
- Intention and motivation to convert to a permanent employee in the mid to long term (not guaranteed but expected path)
- Language:
 - Native or fluent Japanese
 - Daily conversational level English (around TOEIC 600 or equivalent is preferred)

Nice-to-have:

- Experience operating Apache and Tomcat
- Experience with frameworks such as Struts and Spring
- Front-end skills using HTML, CSS, and JavaScript for web UI development
- Experience with public cloud services, Kubernetes, and Docker
- Experience using Git, Jenkins, and Maven in a modern development workflow
- Knowledge of, or strong interest in, payment services and financial systems
