募集要項

COMPANY OVERVIEW

A premier Malaysian ICT infrastructure specialist, primarily recognized for its expertise in Data Centre (DC) consultancy, design, and construction. Established in 1999, the company has evolved from a product distributor into a high-level technical consultancy capable of delivering Uptime Institute-certified facilities.

JOB RESPONSIBILITIES

- Perform preventive and remedial maintenance on electrical systems and equipment in data centres
- Troubleshoot and resolve issues related to electrical systems in the data centre.
- Respond promptly to any electrical equipment breakdowns, including during non-office hours, weekends, and public holidays.

- Assist Senior Technical Engineer, Assistant Technical Service Manager & Technical Service Manager in conducting services such as:
 - Power audit
 - Generator set maintenance
 - LV electrical system maintenance
 - Thermal scanning
 - Grounding measurement

- Provide standby support for activities including genset testing, TNB outages, HT switchgear servicing, electrical load migration, and load testing.
- Install, test, and commission electrical systems such as UPS, power distribution equipment, CCTV, access control, environmental monitoring, and fire detection/suppression systems.
- Maintain and update all maintenance documentation and service reports.
- Continuously learn and master electrical engineering and relevant data centre infrastructure systems to support preventive and corrective maintenance.
- Undertake other duties as assigned by the Technical Service Team Lead and Manager.

JOB REQUIREMENTS

- Bachelor's Degree in Electrical or Mechanical Engineering, or relevant professional certification.
- Minimum 2 years of relevant working experience.
- Experience in preventive and predictive maintenance planning, scheduling, and execution.
- Strong problem-solving abilities and ability to contribute effective solutions.
- Positive, proactive, and able to work both independently and in a team environment.
