募集要項

Join a global team that helps organizations turn bold ideas into real-world impact. Working alongside talented colleagues across the world, you'll help clients rethink how they use technology to grow, innovate, and build a more sustainable future. From shaping strategy to designing and engineering cutting-edge solutions in AI, cloud, and data, you'll be part of projects that solve meaningful challenges and create lasting value for businesses, communities, and your own career.

Role Overview

- Support day-to-day management of a ~40-person data and analytics team covering:
    - Applied AI/ML
    - Data architecture
    - Data engineering

    - Data visualization
    - ERP analytics
- Act as a strategic advisor to executive-level clients, primarily in financial services (insurance focus, plus banking and capital markets), as well as other industries.
- Lead client engagements from opportunity shaping through delivery, ensuring measurable business value.
- Translate complex business requirements into scalable, secure, end-to-end architecture solutions across major cloud platforms (AWS, Azure, GCP).
- Provide technical leadership across cross-functional teams.
- Drive business development activities such as proposal creation, client presentations, solution design, and deal closure.
- Own and deliver against revenue targets, utilization goals, and team performance KPIs.
- Represent the team in regional and global forums and contribute to thought leadership in data and AI strategy.

スキル・資格

- 10+ years of consulting or relevant industry experience in data, analytics, or digital transformation.
- Strong background in solution architecture with recent experience in strategic advisory and business development.
- Deep expertise across:
    - Data strategy
    - Applied AI/ML
    - Enterprise data architecture
- Ability to present to and influence senior stakeholders and lead executive-level discussions.
- Experience managing large teams, complex programs, and multiple workflows.
- Proven experience owning project P&L and consistently meeting revenue targets.
- Cloud solution architect certification (AWS, Azure, or GCP) is highly preferred.
- Strong communication and leadership skills
