募集要項

Join a global team that helps organizations turn bold ideas into real-world impact. You will work alongside talented colleagues across the world to help clients rethink how they use technology to grow, innovate, and build a more sustainable future. From shaping strategy to designing and engineering cutting-edge solutions in AI, cloud, and data, you will contribute to meaningful projects that create lasting value for businesses, communities, and your own career.

Key Responsibilities:

- Perform as an insurance application manager to lead or support application analysis and solution design based on microservice architecture
- Analyze insurance business logic and operational flows to design system functionality based on microservice architecture
- Deliver or support Agile, Cloud, and AI system applications

スキル・資格

- 15+ years of application development and maintenance experience
- 5+ years of working experience in the insurance industry
- 10+ years of experience working with onsite/offshore delivery models
- Strong technical expertise in:
  - Application architecture
  - DevOps / CI-CD
  - Cloud / Data / AI
- Solid knowledge of insurance products and operations
- Strong sense of issue and risk management, with proactive problem-solving and continuous quality improvement
- Strong communication and presentation skills
