募集要項

Job Description

- Formulate project plans based on business requirements (schedule, budget, structure, risk planning).
- Coordinate and build consensus with clients and internal stakeholders during the requirements definition phase.
- Manage and report on project progress, cost, and quality.
- Manage tasks, resource coordination, and deliverables for the development team (engineers, designers, testers, etc.).
- If you have English proficiency, you may be assigned to project management, including offshore control (at our Indian base). A support team, including PMO members, will back up your daily operations, allowing you to focus on project management.

スキル・資格

Required Requirements

- More than 5 years of project management experience
- More than 5 years of design and development experience

- Native-level Japanese skills

Preferred Requirements

- Modern front-end development experience such as React (including Next.js), Angular or Vue
- Development experience in C#.NET core (including MVC)
- Development experience on Azure
- Experience developing data integration programs with SAP (BAPI, iDocs, etc.)
- Business-level English skills
