## Senior Python Engineer 【English Enviroment】

**Python Engineer at a leading company!**

### 募集職種

#### 人材紹介会社

マイケル・ページ・インターナショナル・ジャパン株式会社

#### 求人ID

1580167

#### 業種

インターネット・Webサービス

#### 雇用形態

派遣

#### 勤務地

東京都 23区

#### 給与

時給制

#### 時給

¥3000 - ¥5500

#### 更新日

2026年02月28日 13:07

### 応募必要条件

#### キャリアレベル

中途経験者レベル

#### 英語レベル

ビジネス会話レベル

#### 日本語レベル

基礎会話レベル

#### 最終学歴

大学卒：学士号

#### 現在のビザ

日本での就労許可が必要です

### 募集要項

These roles focus on building and maintaining scalable backend systems using Python or Rust, leveraging modern cloud infrastructure such as AWS, Terraform, Docker, and GitHub Actions. Ideal candidates bring at least 5 years of engineering experience, strong cloud and automation skills, and optional expertise in areas like geospatial technologies, orchestration tools, or algorithmic optimization.

### Client Details

The client is a leading mobility-tech organization focused on developing advanced software platforms, automated driving technologies, and next-generation smart-city infrastructure. Rooted in human-centric innovation, they are driving the future of transportation by building intelligent systems that enhance safety, connectivity, and mobility on a global scale.

### Description

- Design, build, and maintain scalable backend systems using modern programming languages such as Python and Rust.

- Develop and deploy cloud-based infrastructure and services using AWS, IaC tools like Terraform, and containerization technologies such as Docker and Kubernetes.
- Implement reliable CI/CD pipelines and automation workflows using tools like GitHub Actions to ensure smooth delivery and operational efficiency.
- Analyze complex technical problems to optimize algorithms, enhance system performance, and integrate with data-driven or geospatial solutions when required.

#### Job Offer

- Competitive salary!
- Flexible work mode!

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Serina Miyazono on +81 3 6627 6130.

---

#### スキル・資格

- Brings strong backend engineering expertise with 5+ years of hands-on experience, particularly in Python and/or Rust, and excels at building reliable, scalable systems.
  - Demonstrates solid cloud proficiency, including AWS, Terraform, Docker, and Kubernetes, with the ability to design, automate, and maintain modern infrastructure.
  - Shows strong problem-solving and analytical skills, capable of optimizing algorithms, improving system performance, and navigating complex technical challenges.
  - Possesses good software engineering fundamentals, including version control, CI/CD practices, and familiarity with tools like GitHub Actions-with bonus strengths in areas like orchestration (Airflow/Dagster) or geospatial technologies.
- 

#### 会社説明

The client is a leading mobility-tech organization focused on developing advanced software platforms, automated driving technologies, and next-generation smart-city infrastructure. Rooted in human-centric innovation, they are driving the future of transportation by building intelligent systems that enhance safety, connectivity, and mobility on a global scale.
