募集要項

■Job description

-You will be responsible for promoting digital transformation for our customers using the ERP package and core system D365.

-As an end-to-end service for core system implementation projects, you will be responsible for everything from requirements definition to design, development, testing, and offshore management.

-After design, you will communicate the specifications to the appropriate department in the offshore project team, manage the project progress, and connect to offshore development.

-You will be responsible for reviewing and inspecting deliverables before release to customers, and for operational support after release, building ongoing customer relationships.

スキル・資格

Eligibility to apply※Please apply if any of the following applies to you.

・Experience implementing D365 product implementation projects as a business/application consultant/designer

・Experience implementing projects using D365 products (especially D365 FO, SCM, CRM)

・Experience implementing ERP (regardless of product), experience implementing products such as Oracle

・Experience in system development and system implementation, and want to try projects using D365
