募集要項

■Job description:

・You will be responsible for promoting digital transformation for our customers using the ERP package and core system SAP/D365.

. As an end-to-end service for core system implementation projects, you will be responsible for everything from requirements definition to design, development, testing, and offshore management.

・You will be responsible for upstream design and general project management, such as system proposals, business analysis, requirement definition, customer negotiations, and team communication. We will work together as one team with our Japanese and Vietnamese bases to advance development. Managers and above will also be responsible for managing personnel resources and income and expenditures.

スキル・資格

■Required skills:

・PM and PL experience in medium to large-scale ERP (SAP/D365/Oracle) package projects

・Experience in requirements definition and basic design, and has experience in supervision, and is familiar with software quality control and has experience in supervision

・Experience implementing SAP/D365 (regardless of product), and experience implementing ERP package products such as Oracle
