募集要項

Key responsibilities:

1. Design, deploy and manage scalable and secure GCP environments.
2. Automate infrastructure provisioning and management (IaC, scripting).
3. Monitor provisioning, cost optimization, and security.
4. Troubleshoot complex issues and provide technical guidance.

Key Technologies:

1. **GCP Foundation:** Deep, practical experience in designing and implementing GCP landing zones and organization structures based on the Google Cloud Adoption Framework.
2. **GCP Networking:** Advanced knowledge of VPC design, Shared VPCs, hybrid connectivity (Interconnect, VPN), and load balancing.
3. **GCP Security:** Expertise in implementing security best practices, including IAM, resource policies, and network security controls.
4. **Infrastructure as Code:** Strong proficiency in Terraform for automating the deployment of GCP infrastructure.

スキル・資格

Requirements:

1. Japanese/English bilingual fluency.
2. In depth knowledge of core GCP services - compute engine, storage, Cloud functions, networking, IAM.
3. Strong experience in Terraform/ ansible (IaC).
4. Solid understanding of TCP/IP, DNS, Load balancing, VPCs and network security.
